Paperblanks Announces Spring 2022 Collection

This season brings a bold and emotive new collection of designs to the Paperblanks collection. Featuring a variety of artistic traditions, from Baroque to Art Deco, folk art to “digital alchemy,” as well as new designs from some favourite sources, the Spring 2022 collection truly has something for everyone. Especially notable is the latest release from Paperblanks’ exclusive collaboration with The New York Public Library – a Maya Angelou Embellished Manuscript – and the first official co-branded release with Getty – Van Gogh’s Irises.

“We have scoured the world’s most famous institutions to share the Getty Museum’s renowned Van Gogh’s Irises painting and the art deco-style binding Shape Shift from the Spencer Collection in The New York Public Library. The exotic elements of the season are seen in the fascinating Humming Dragon cover by Android Jones, the intricate Moorish Mosaic series and the fairytale-like vision of the Firebird notebook cover.” – Adina Costiuc, Associate Art Director

Along with new hardcover journals and softcover Flexi notebooks, this new collection also offers a variety of new bookmark, canvas bag, pencil case and jigsaw puzzle designs, as well as a beautiful new guest book.

“This Spring showcases a broad range of what inspires our covers, from Impressionist art to antique binding. These designs have allowed us to add to our offerings of accessories with new bookmarks, pencil cases, puzzles and canvas bags, expanding the Paperblanks brand and how customers choose to express themselves with our designs.” – James Whittaker, Sales Director
